

**PROACTIVE**  
INFECTIOUS CONTROL

## Infection Free Workplace Webinar Series

This 3-Part Infection Free Workplace Webinar Series provides small business owners with timely, relevant, actionable information on returning to work safely following the COVID-19 pandemic.

### **Part 1: Risk Reduction Strategies (45 mins)**

This session discusses state-specific requirements, operational considerations and specific components of an infection prevention and control program that reduce the risk of transmission to customers. Participants will learn key strategies to reduce and manage risk through adaptations in the physical environment and in daily business operations.

### **Part 2: Bringing Employees Back to Work Safely (45 mins)**

This session addresses considerations for reducing transmission among employees with guidance for compliance coordination with state and local health requirements, staff training recommendations, specific action steps to reduce the likelihood of outbreaks, and handling employee exposure events. Participants will learn key strategies to reduce risk through hazard recognition and implementation of adapted processes to reduce and manage occupational exposure.

### **Part 3: Employee Infection Prevention & Control Basis (30 mins)**

This session provides focused COVID-19 infection prevention and control training for members of the workforce. Content addresses understanding how COVID-19 may be spread in the workplace and reducing the risk of spreading infection to customers and co-workers through targeted action steps. Use this content to meet employee training requirements and access the recording for future on-demand education sessions with your team members.
